Define the Problem Statements

Date	31 January 2025
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Customer Problem Statement Template:

A clear problem statement helps identify the challenges faced by users and organizations while processing credit card applications. In this project, the problem statement was developed to understand the difficulties involved in accurately approving or rejecting credit card applications using traditional manual methods. By identifying the needs, challenges, and expectations of financial institutions and applicants, the problem statement provides a clear direction for designing an effective Machine Learning-based solution. This process also helps in understanding the users' perspective and ensures that the developed system addresses real-world problems with improved accuracy, efficiency, and reliability.

Problem Statement (PS) 1:

I am	A Bank Loan/Credit Card Officer
I'm trying to	Approve genuine credit card applications quickly and accurately.
but	It is difficult to manually verify every application without mistakes.
because	A large number of applications and customer records need to be analyzed, making the process time-consuming and prone to human error.
which makes me feel	Stressed and concerned.

Problem Statement (PS)2

I am	A Bank Loan/Credit Card Officer
I'm trying to	Approve genuine credit card applications quickly and accurately.
but	It is difficult to manually verify every application without mistakes.
because	A large number of applications and customer records need to be analyzed, making the process time-consuming and prone to human error.
which makes me feel	Stressed and concerned.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A bank loan/credit card officer	Approve genuine credit card applications quickly and accurately	It is difficult to manually verify every application without mistakes	A large number of applications and customer records need to be analyzed, making the process time-consuming and prone to human error	Stressed and concerned about making incorrect approval or rejection decisions
PS-2	A credit card applicant	Receive quick and fair approval for my credit card application	The approval process takes a long time and may sometimes reject eligible applicants	Traditional evaluation methods require manual verification and multiple checks before making a decision	Frustrated, anxious, and uncertain about the application status
