

Ideation Phase

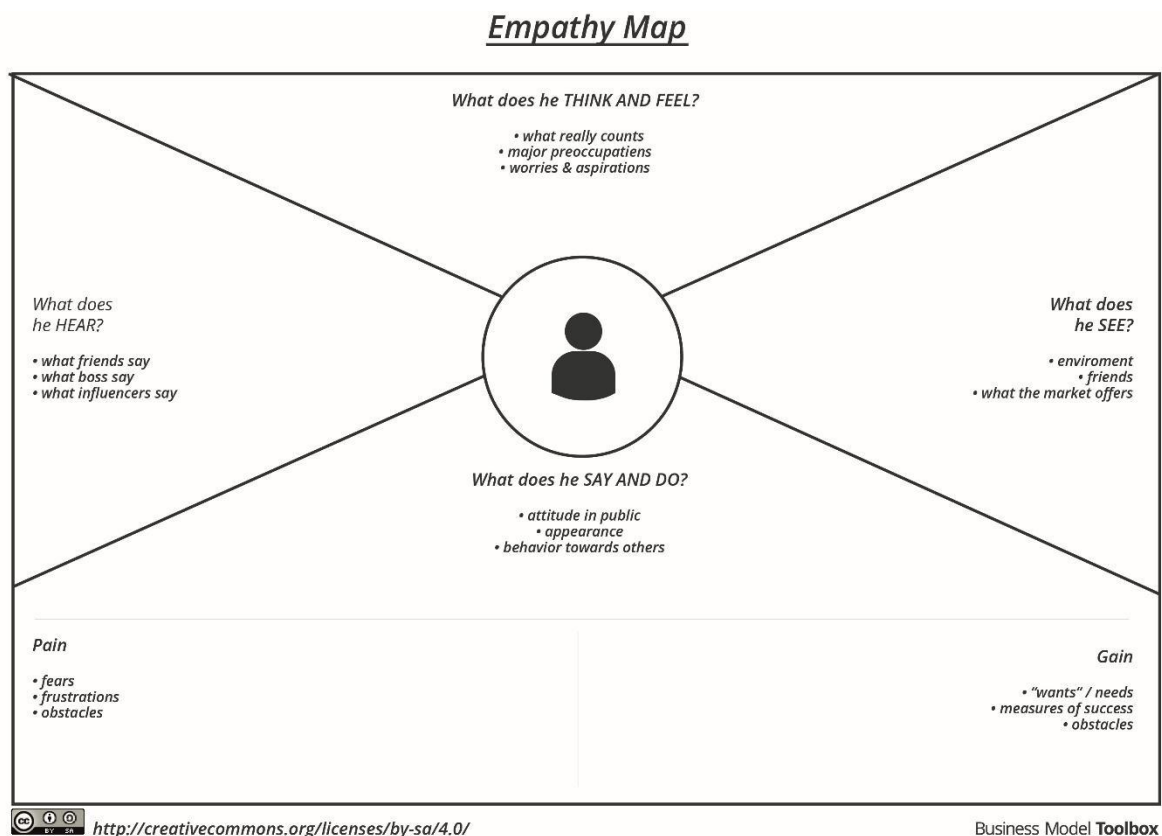

Empathize & Discover

Date	3 JULY 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Empathy Map Canvas:

An empathy map is a user-centered design tool that helps understand the thoughts, feelings, behaviors, and challenges of the end user. It provides a structured way to analyze the user's perspective, making it easier to design a solution that effectively addresses their needs. For this project, the empathy map focuses on a **Bank Credit Card Approval Officer**, who is responsible for reviewing applications and making approval decisions. Understanding the officer's daily responsibilities, concerns, and expectations helped in designing a Machine Learning-based Credit Card Approval Prediction System that supports faster, more accurate, and reliable decision-making while reducing manual effort.
