

Project Design Phase-II

Data Flow Diagram & User Stories

Date	4 JULY 2026
Team ID	
Project Name	Credit Card Approval Prediction
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: DFD Level 0 (Industry Standard)

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Transaction Input	USN-1	As a user, I can enter transaction details through the web interface for prediction.	The system accepts all required transaction details successfully.	High	Sprint-1
Customer (Web User)	Input Validation	USN-2	As a user, I want the system to validate my inputs before prediction.	Invalid or empty inputs are rejected with appropriate messages.	High	Sprint-1
Customer (Web User)	Data Preprocessing	USN-3	As a user, I want the system to preprocess transaction data automatically before prediction.	The Time and Amount features are scaled correctly before prediction.	High	Sprint-1
Customer (Web User)	Prediction	USN-4	As a user, I want to know whether my transaction is Genuine or Fraudulent.	The prediction result is displayed accurately.	High	Sprint-1
Customer (Web User)	Result Display	USN-5	As a user, I can view the prediction result on a separate page.	The result page displays the prediction clearly	Medium	Sprint-1
Administrator	Model Management	USN-6	As an administrator, I can load the trained Random Forest model for prediction.	The application loads the model successfully without errors.	High	Sprint-1
Administrator	Model Maintenance	USN-7	As an administrator, I can replace the trained model when a better model is available.	The application works correctly after replacing the model file.	Medium	Sprint-2
Administrator	Application Maintenance	USN-8	As an administrator, I can update the application without affecting prediction functionality.	The application remains stable after updates.	Low	Sprint-2
